## SKILLS

|                       |                                                                                                                                                                                              |
|-----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Languages:            | Python, Java, C++, JavaScript                                                                                                                                                                |
| Frameworks:           | React, HTML, CSS, FastAPI, Flask, Node.js                                                                                                                                                    |
| Tools/Platform:       | Git, VS Code, Docker, Kubernetes                                                                                                                                                             |
| Concepts/Methodology: | Data Structures & Algorithms, Object-Oriented Programming (OOP),<br>Asynchronous Programming, RESTful API Design, Agile                                                                      |
| Additional Skills:    | API Integration & Optimization, Model Optimization & Data<br>Preprocessing, Version Control (Git), Test-Driven Development (TDD),<br>CI/CD Pipeline Setup, Cloud Platforms (AWS, GCP, Azure) |
| Soft Skills:          | Problem Solving & Analytical Thinking, Team Collaboration &<br>Communication, Adaptability & Continuous Learning, Time Management<br>& Prioritization, Attention to Detail                   |

## EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                    |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| <b>flickDone – Data Engineer Intern</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | June 2025-Aug 2025 |
| <ul style="list-style-type: none"><li>Built a Hindi–Bharati Braille parallel corpus comprising 50,000 sentence pairs for accessibility-focused NLP applications</li><li>Implemented automated data quality validation using Python scripts and visualisation tools</li><li>Significantly improved data verification efficiency through automated validation workflows</li><li>Studied and incorporated Braille Council of India standards to ensure compliance and data accuracy</li><li>Collaborated with cross-functional teams to integrate a back-translation engine into AI/ML pipelines and performed data processing and optimisation to enhance model performance, flexibility, and accessibility outcomes.</li></ul> |                    |

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                     |                    |

## ACHIEVEMENTS

- Winner – Hackathon 2025 (functional software shipped within strict constraints).
- Delivered multiple deployed prototypes with clean documentation, testing, reliability focus.

## EDUCATION

|                                                                                                                |                                     |
