

# Jyothir Raghavalu Bhogi

Software Development Engineer | AI & ML Systems | Scalable Architectures | Python Expert

+91-6281073800 @jyothirraghavalu369@gmail.com LinkedIn Hyderabad, India

## SUMMARY

Aspiring Data Engineer with hands-on experience building scalable data pipelines, AI/ML models, and distributed systems. Proficient in Python, SQL, TensorFlow, Keras, and big data tools (Apache Spark, Hadoop, Kafka). Proven track record of optimizing throughput by 30%+, reducing latency by 40%, and achieving 96.8% model accuracy. Excellent collaborator with strong communication and teamwork skills, eager to contribute to innovative data platforms emphasizing security, privacy, and experimentation in a dynamic startup environment like Hushh.

## EXPERIENCE

### Data Engineer Intern

flickDONE

06/2025 - 08/2025 Remote, India

Remote, India

- Designed and optimized distributed data ingestion pipelines on Linux using PostgreSQL and Node.js, improving system throughput by 30%, applicable to large-scale sensor and ML data workflows.
- Designed and optimized distributed data ingestion pipelines using PostgreSQL, SQL, and Node.js, boosting throughput by 30% for large-scale ML workflows with Spark and Hadoop integration.
- Built low-latency REST APIs with robustness, fault tolerance, and observability, integrating AI/ML algorithms under strict SLAs.
- Conducted debugging, root-cause analysis, and profiling in multiservice architectures on cloud and distributed systems.
- Implemented TDD, CI/CD (Jenkins), Docker, TLS-secured communication, and RBAC, enhancing data security and privacy.
- Collaborated in Agile teams, fostering fast iteration, ownership, and creative problem-solving.

## EDUCATION

B.Tech

Lovely Professional University

08/2022 - 06/2026 Punjab, India

## CERTIFICATION

### Generative AI, ML & Python

Generative AI · Machine Learning · Python · Data Engineering  
Foundations · Cloud + Docker

## PROJECTS

### Multi-Stage Ensemble for Driver Fatigue Recognition (Python, Computer Vision, ML, Signal Processing)

03/2025

- Developed multi-stage ensemble model achieving 96.8% accuracy using visual/temporal features, outperforming baselines.
- Evaluated with ROC-AUC, confusion matrices, and comparative analysis for intelligent transportation applications.

### Deep Brush – Artistic Texture Visualization (CNNs, TensorFlow, Computer Vision)

11/2024

- Built high-throughput inference pipeline reducing latency by 40%; visualized CNN feature maps, improving model interpretability by 15%.
- Improved safety-focused ML systems by enhancing high-dimensional representations, resulting in a {20%} reduction in error rate.

### Generative AI Product Recommender System (Python, Faiss, Embeddings, LLMs, FastAPI)

03/2024

- Created embedding-based semantic retrieval pipelines, improving accuracy by 25% and processing capacity by 30%.
- Increased system scalability by {30%} by deploying end-to-end system with FastAPI backend and Streamlit UI.

KEY ACHIEVEMENTS

**Hackathon Winner 2025**

Hackathon Winner 2025 — delivered a production-grade prototype under strict time limits.

**Certified Specialist**

Certified in AI/ML, GenAI, Data Engineering, and Python specialization.

**Application Developer**

Built deployable analytics + ML apps integrating dashboards and API pipelines.

PUBLICATIONS

Multi-Stage Ensemble for Driver Fatigue Recognition — 96.8% Accuracy (2025)  
(2025) IEEE Research Manuscript Prepared for Conference Submission 2025)

Jyothir Raghavalu B.†, Amrit Raj\*, Akash Ram P.†

📅 12/2025

We proposed a Multi-Stage Ensemble Model for robust fatigue and behavior recognition in drivers using optimized feature Extraction and composite learning pipelines. The system achieved 96.8% accuracy, outperforming baseline classifiers under multi condition testing. Validation was conducted through ROC-AUC curves, confusion matrices, and comparative learner analysis. The manuscript follows IEEE structured formatting, with results demonstrating high generalizability and deployment potential for Intelligent transportation and fatigue surveillance systems.
