Professional Summary

Final-year **B.Tech Computer Science** student specializing in **Artificial Intelligence and Machine Learning** at **Lovely Professional University**, with hands-on experience in **ML model training, tuning, and debugging (GBDTs and Transformers)**. Proficient in **Python, PyTorch, TensorFlow, scikit-learn, XGBoost, NumPy, and Pandas**, with a proven track record from a **Data Engineering Internship at flickDONE**, where I built **scalable data pipelines** and **reduced manual effort by 70%**. Demonstrates **high agency** in driving projects from **hypothesis to deployment**, with strong **algorithms, data structures, and object-oriented design** skills. Eager to collaborate with **Hushhai's** tight-knit team to **prototype ML models** for **search, ranking, and recommendations** in a **fast-paced, production-focused environment**.

Technical Skills

- **Languages:** Python, Java, SQL, Scala
- **ML Frameworks:** PyTorch, TensorFlow, scikit-learn, XGBoost, LightGBM, Hugging Face Transformers
- **Data Tools:** NumPy, Pandas, PySpark, Jupyter Notebook, Git
- **Concepts:** Model Training, Tuning, & Debugging (GBDTs, Transformers), Data Pipelines & Reproducibility, A/B Testing & Success Metrics, ML Metrics (MRR, MAP, precision/recall, AUC, F1, NDCG), Loss Functions (Plackett-Luce, cross-entropy, focal loss), Algorithms, Data Structures, Object-Oriented Design, Data Drift Mitigation, Target Leakage Detection, Research Awareness (ML/RL Literature)
- **Soft Skills:** High Agency, Ownership, Clear Communication, Collaboration

Professional Experience

flickDONE – Data Engineer Intern

June 2025 – Aug 2025 | Remote, India

- Prototyped and deployed **ML models** for a **Hindi-to-Bharati Braille corpus (50,000+ pairs)** using **PyTorch** and **XGBoost**, optimizing for **accessibility** with **data drift mitigation**.
- Built **PySpark data pipelines** to ensure **reproducibility and monitoring**, reducing **manual effort by 70%**.
- Designed **A/B tests** to validate **model performance**, defining metrics like **precision/recall** and analyzing results to **refine outputs**.
- Contributed to **code quality** by developing **internal scripts** for **training and evaluation**, addressing **target leakage** and **temporal skew**.
- Collaborated with teams to align **ML solutions** with **business objectives**, communicating **insights effectively**.

Projects

- **Observability Pipeline Simulation (Personal Project)**
 - Developed a **Transformer-based recommender** using **PyTorch** and **Hugging Face**, focusing on **search and ranking for personalized experiences**.
 - Built **PySpark pipelines** for **data preprocessing**, ensuring **lineage** and **scalability**.
 - Designed **A/B tests** with metrics like **NDCG** and **MAP**, optimizing with **cross-entropy loss** for **user engagement**.
- **Generative AI Product Recommender System**
 - Trained **XGBoost models** and debugged **temporal skew issues** using **scikit-learn**, deploying via **Flask**.
 - Created **visualizations** to monitor **model performance**, applying **focal loss** for **imbalanced data**.
 - Demonstrated **ownership** by identifying **improvement opportunities** and **implementing them independently**.

Certifications

- **Applied Predictive Modeling**– Coursera
- **Advanced Neural Networks** – Coursera

Education

- **Lovely Professional University - B.Tech in Computer Science** with specialization in **Machine Learning and Artificial Intelligence** | Expected Graduation 2026 | CGPA: 6.46 | Jalandhar, Punjab
